**About Construction
Work:**

The **Northern Nevada Sheet Metal Workers Apprenticeship** program is an excellent opportunity for individuals looking to pursue a career in the sheet metal industry. Apprenticeships are a great way to gain practical skills and knowledge while also earning a competitive income with benefits.

Here are some key points, highlighting our program:

·**High-Quality Job Opportunities:** The program offers a pathway to first-rate, good paying jobs in the sheet metal industry. This is a crucial benefit for individuals seeking stable and well-compensated employment.

·**Diverse Skill Development:** Sheet Metal Apprenticeship provides a comprehensive education, including training in HVAC, welding, computer aided drafting, fabrication, architectural, and more. This diversity of skills can make graduates highly versatile and valuable in the industry.

·**On-the-job Training:** On-the-job training is a crucial component of apprenticeships. It allows apprentices to learn and apply their skills in a real-world setting, gaining practical experience.

·**Classroom and Shop Education:** The combination of classroom and shop education is a well-rounded approach. Classroom instruction provides the theoretical knowledge, while shop education offers hands-on practice, ensuring apprentices are well-prepared for their future roles.

·**Experienced Instructors:** Our training center employs top-level instructors, which is a significant advantage. Having experienced and skilled instructors greatly enhances the quality of education, safety, and training provided to apprentices.

·**Four-Year Program:** A four-year apprenticeship program allows for in-depth learning and skill development. Graduates are well-prepared for their careers at the journeyman level after completing the program.

·**Journeyman Status:** Graduates becoming Journeymen signifies that they have successfully completed their apprenticeship and are recognized as skilled professionals in the field.

Requirements are: minimum 18 years old, high school graduate or equivalency with official transcripts, valid drivers license, and social security card.

Must be physically capable of performing essential functions of the program without posing a threat to the health and safety of themselves or others.

As with any other field, there are some basic requirements for a career in the sheet metal industry:

- Basic mechanical and math skills
- Good eye-to-hand coordination
- Understanding of spatial relationships
- Excellent work and study habits
- Ability to work well in teams
- Solid reasoning skills
- Problem solving capability
- Enjoy working with your hands
- Reliable and responsible
