Hello,

The wages listed on the 5910 are the correct wages. The employer that signed the agreement will be offering higher wages than what we are requesting as a minimum approved wage for the occupation.

- 1) The occupation does not require certification of licensure in Nevada.
- 2) Computing Technology Industry Association, a national non-profit trade association for the information technology industry, has identified the appropriate coursework and hours required for the apprenticeship.
- 3) If approved, an apprentice will be recruited and hired at PacStates by June 30, 2022.

Best,  
Cheryl Olson

Hello,

The wages listed on the 5910, Appendix A and the Apprenticeship Agreement, DO NOT match the wages listed on Appendix E. Resubmit corrected documents with the proper wages ASAP.

Additionally, when submitting the requested documents above, submit answers to the following questions for this occupation.

1. Does this occupation require any certificate or license in the State of Nevada?
2. With the listed RTI of 503 hours, where/who certified and/or approved that this is the proper curriculum and hours needed for this program? List specific names/organizations.
3. If the proposed occupation is approved, when will an apprentice(s) be indentured? Where will the apprentice(s) be employed? List specific dates/names.

Also note, if you intend to send any additional occupations, revisions to previously approved standards or newly proposed standards, they will be considered for a future NSAC 2022 agenda/meeting (May, August, November).
